

Package Documentation

Important Setup: 2D Animation Package

To deliver high-quality, smooth bone animations, our package requires Unity's official **2D Animation** package. This is a free, highly optimized package provided directly by Unity, ensuring excellent performance for your games.

Automatic Installation

When you import the package, a popup window will automatically ask to install this dependency for you. Simply click "**Yes, Install Now**" and you are ready to go!

Manual Installation Guide

If you prefer to install it manually, or if you accidentally skipped the automatic popup, please follow these easy steps:

- 1 In Unity, navigate to the top menu and go to **Window > Package Manager**.
- 2 Change the top-left dropdown menu to **Packages: Unity Registry**.
- 3 Search for **2D Animation** in the top-right search bar.
- 4 Select the package and click **Install** at the bottom right corner.

Enjoying This Asset?

Your reviews make a huge difference! They help us improve our assets, fix issues quickly, and create more high-quality content for developers like you. It only takes a minute to share your thoughts.
